

# Pods can make your home more profitable

MAKE 2012 more profitable by turning your existing kitchen and laundry spaces into extra bedrooms.

The PKL KitchenPod and LaundryPod are permanent modular buildings which enable you to maintain a full catering and laundry service, while turning existing facilities into revenue-generating space.

They are available in a wide range of external finishes, including custom colours and brick or wood cladding, so they can complement surrounding buildings.

Both come fully equipped with high-quality professional equipment to suit your requirements, and are available on either a purchase or contract rental basis.

PKL also provides inclusive service, parts, labour and preventative maintenance visits, both for the building and the equipment inside.

Ready within just six weeks of order, KitchenPods and LaundryPods arrive on-site fully equipped and ready to connect to services, and can be up and running within a matter of hours. What's more, if your needs change, they can be relocated, moved or extended as required.
